

Credit Card Management

DESIGNED FOR MICROSOFT DYNAMICS™ NAV

BENEFITS

- A PCI-compliant solution
- Process Credit Cards directly in MS Dynamics™ NAV.
- Everything is handled in MS Dynamics™ NAV; NO EXTERNAL TERMINAL is necessary.
- Payments can be automatically posted.
- The system handles separate authorization and capturing of funds.
- Will handle credit cards on all sales documents and also stand alone (no document).
- Supports 67 Payment Gateways, including: Authorize.NET, VeriSign, Skipjack, YourPay, eWay, and many more!
- Batch Posting capabilities
- Ability to charge or create credits directly from the Cash Receipts Journal
- Has the ability to allow capture amount to be more than authorization amount. (must check with your gateway to see if this is allowed)

CREDIT CARD MANAGEMENT

SimCrest Credit Card Management is a PCI-compliant solution which enables you to receive credit card payments directly in Microsoft Dynamics™-NAV (Navision). All credit card transactions are done in Dynamics™ NAV and can be automatically posted in Dynamics™ NAV. Credit card transactions are separate from A/R transactions. The system allows credit card transactions to be done with or without a sales transaction. The system can accept credit card payments and credits on:

- Sales Order
- Sales Journal
- Sales Invoice
- Sales Credit Memo
- Stand Alone (not attached to any document)

The system handles authorization and capturing either combined or separately. It is also possible to save credit card information within the system for each customer.

HOW IT WORKS

Let's say that you want to receive a credit card payment after entering an order. After selecting the Credit Card menu you will be able to enter the information on the card. You will also be able to enter Card Verification Value (CVV2) and change the address to match the card. If the credit card transaction is linked to a sales transaction, then it will suggest the amount of the sale. The user can overwrite this if necessary and do a credit card transaction for more or less the amount on the sales order. When you submit the request, the system will send it over the Internet and Authorize and/or Capture the funds according to your request.

The system will respond back to you with any problems that may occur. For instance if the credit card number is invalid or the card has been cancelled it will give you an appropriate response. Everything is handled inside Microsoft Dynamics NAV thus no external terminal is required.

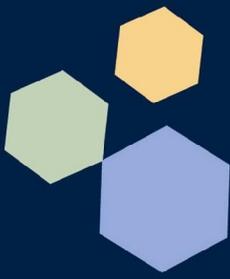

The system supports 67 different Payment Processing Gateway Providers (PPGP): Authorize.Net, Skipjack, VeriSign.com and many, many more.

Special Lower Authorize.Net Sign-up Rates and **Instant Establishment** of Live VISA/ MasterCard Merchant ID negotiated through www.e-onlinedata.com/simcrest (American Express and Discover also available)

Other Add-ons from SimCrest®

DESIGNED FOR MICROSOFT DYNAMICS™ NAV

PRODUCT CONFIGURATOR

Benefits:

- Assists your sales Department in selecting the right configuration for your clients
- A Production Configurator to help you manufacture a specific production BOM and routing, or Kitting
- Support an indefinite number of levels in the questionnaire
- Available with Web Enhancement Integration

QUICK PAYROLL

Benefits:

- Fully functional US and CA payroll integrating to Dynamics™ NAV G/L and Bank Ledger
- All federal and state reports included
- Keep track of upcoming events like when to file and pay taxes
- File and pay payroll taxes electronically with subscription

ELECTRONIC BANK RECONCILIATION

Benefits:

- Fully-integrated to the existing Dynamics™ NAV Bank Reconciliation system.
- Has zero footprint in standard Dynamics™ NAV making it very easy to install and implement.
- Reconcile your account within just a few minutes!
- Download statements electronically from your bank.

AUTO EMAIL

Benefits:

- Never again will you have to print and mail documents
- Print documents in HTML or PDF Format
- Save on costly pre-printed documents, postage, and envelopes
- Include logo's and other graphics in the printed documents

PRINT-2-EXCEL®

Benefits:

- Print (export) any Dynamics™ NAV report or document to Excel®
- As easy as clicking the Print button
- No need for Dataports
- Works for all Dynamics™ NAV reports and documents without modifications

ROUTE PLANNER

Benefits:

- Create the most efficient delivery routes by a few clicks
- Automatically calculate the total weight and volume of each truck to avoid overweight and overload
- Deliver more while saving time, miles, and fuel expenses
- Detailed driving directions with highlighted routes and stops displayed on a map
